SUMMARY

Senior Frontend Engineer with 6+ years of experience delivering scalable web applications for B2C, B2B, and enterprise environments. Specialized in Angular, Vue, and React ecosystems, micro-frontend architecture, reusable component systems, performance optimization, and technical SEO. Strong track record building trading platforms, operational dashboards, and high-traffic websites with maintainable architecture and consistent UX quality improvements.

+ EXPERIENCE

📍 Darmawan Aryansyah Group — Senior Frontend Engineer Oct 2025 – Present

- Own end-to-end frontend delivery across multiple business-critical products as the primary frontend engineer.
- Architect and implement **micro-frontend patterns** with reusable shared modules, including search and trading chart components used across financial web applications.
- Build production-grade applications using **Angular, Vue 3, React, and Next.js**, with strong focus on modularity and long-term maintainability.
- Deliver trading systems, operational dashboards, and company profile websites using **PrimeVue** and **Tailwind CSS** with emphasis on performance, SEO, and responsive UX.
- Integrate frontend systems with **REST API, WebSocket**, and microservices-based backend services for real-time workflows.
- Improve Lighthouse quality, rendering performance, and frontend stability through iterative optimization and reusable implementation patterns.
- Handle deployment and runtime setup using **Docker, Nginx, AWS (S3, WAF), GCP, and Firebase**.

📍 Farmaku.com — Senior Software Engineer Feb 2019 – Aug 2025

Promoted from Software Engineer

- Develop and maintain high-traffic user-facing features using **Angular, TypeScript**, and **PHP** in production environments.
- Build reusable UI components and internal frontend libraries that accelerate feature development across teams.
- Optimize page performance across browsers and devices to improve speed, responsiveness, and user interaction quality.
- Partner with product, design, and backend teams to deliver scalable and reliable frontend releases.
- Lead technical SEO implementation to improve search visibility, crawlability, and organic performance.
- Contribute to multiple production systems, including **B2C, B2B, and POS** applications.
- Perform code reviews and enforce frontend best practices for consistency, quality, and maintainability.

📍 Wave Consulting Indonesia — Software Engineer (Short-Term Contract) Jan 2019 – Feb 2019

- Short-term post-graduation engagement focused on building custom websites and web applications based on client requirements.
- Worked in an agile delivery environment using **Jira** and **TFS**.
